

Read only if you are ready for the solution!

The emerald moon reaches its highest point and there is not much time left. Were you able to solve the legend and beat Jumanji? Or did you perhaps miss something? This is what you should have done in order to break Jumanji's curse.

### LEVEL 7 - ANIMAL ATTACK

After a short time, Jesse has recovered enough to speak. You hear how the curse of Jumanji can be lifted and Jesse hands you a green emerald. You head into the jungle, when suddenly a small monkey jumps on your backpack and runs away with something green in its hands. Then you realize the cheeky monkey has stolen the jewel! You try to go after it, but come face to face with five dangerous animals. On Alan's note you can see what you need to do, to find your way through the jungle. This is the order of the four keys in the Chrono Decoder.

#### 1) Snake

Translate the symbols of the snake with the Rosicrucian's code on the right side of the Chrono Decoder. You will find: "How many times do you yell Jumanji". Afterwards, fold the snake along the fold lines in the order of the numbers. The folded snake has the shape of a number 1.

#### Key 1: 1

#### 2) Find out from which of the six positions you can eliminate the most animals with just one boomerang throw.

There are six locations marked with a black circle on the footprint map. From these spots you can throw the boomerang to hit as many wild animals as possible. Place the boomerang with the small black circle, on the black circles of the map. Check in which location the black line on the boomerang touches the most animals. When trying all six locations, you can see that there's only one position from where you can hit three animals at once. This is location number 6.

#### Key 2: 6

**HINT 1: PLACE THE BOOMERANG WITH THE CIRCLE ON THE BLACK CIRCLES. ON WHAT NUMBER CAN YOU HIT 3 ANIMALS AT ONCE?**

#### 3) Find the location where the monkey hid the jewel. This must be in one of his favorite locations.

The monkey's footprints start in the middle of the woods just slightly above the hippo. Follow these tracks on the front and backside of the paper. You'll see that the monkey encounters the trail of a jaguar and continues walking exactly in the jaguar's footprints ①.

Then the monkey comes across the trail of an elephant and follows its tracks ②. Now follow the combined monkey and elephant tracks to the cave ③. There, the monkey's footprints stop. This means that the monkey has hid the jewel inside the cave. On the cave you'll see a parallelogram. This is the key you need.

#### Key 3: ▭

**HINT 2: FIND THE MONKEY TRACKS AND FOLLOW THEM ON BOTH SIDES OF THE PAPER UNTIL YOU REACH A HIDING PLACE. SOMETIMES TRACKS CAN OVERLAP.**

**4) Check the tattoo on your arm to see how many lives you have left.**

Wrap the paper band around your wrist like a bracelet. You'll see that two of the three holes turn black. The image of the arm is an extra clue that these black tattoo stripes are your leftover lives.

**Key 4: 2**

**HINT 3: HOW MANY LIVES DO YOU HAVE LEFT? ONE, TWO OR THREE? THE ANSWER GIVES YOU THE FOURTH KEY.**

**CODE 1: 1, 6, 2**

**LEVEL 3 - THE BAZAAR**

After your wild animal experience you finally approach your first safe stop: the bazaar. You enter the bazaar to restock your supplies. While you are talking about your encounter with Jesse, a couple of mean looking men walk up to you and start swearing and threatening you. It turns out that Jesse is in debt to some very nasty people. Fortunately, there are a lot of ways to make money inside the bazaar!

Complete the jigsaw puzzle to find a note with possible ways to earn money in the bazaar. This is the order of the code:

**1) Win the staring contest.**

On the jigsaw puzzle you see a man with one eye staring at you at the bazaar. He has a tattoo with four squares against each other forming a bigger square above that you'll see the text "Don't stare". Arrange four of the five eye cards to match four pairs of eyes. As the tattoo indicates, one card is not used for the staring contest. Turn over the eye card and find the solution.

**Key 1: 4**

**HINT 4: PLACE 4 EYE CARDS IN A SQUARE. MAKE SURE YOU CONNECT RIGHT EYES TO LEFT EYES OF THE SAME CREATURE. THE REMAINING CARD IS THE SOLUTION. THE '1' SHOULD BE AT THE BOTTOM LEFT SIDE.**

**2) Find and take the hidden money at the bazaar.**

Find the five hidden piles of money in the bazaar. Turn these five jigsaw puzzle pieces around and find a letter on each jigsaw piece. Shuffle the letters to find the word: "Three".

**Key 2: 3**

**HINT 5: TAKE THE PUZZLE PIECES WITH MONEY OUT OF THE PUZZLE. TURN THEM AROUND AND FORM A 5 LETTER WORD. THE WORD IS A NUMBER.**

**3) Win a dance fight.**

On the transparent sheet you'll see two unsavory guys in black trying to attack you. However you have mastered dance fight moves. Find out which dance move will evade the attacks of both guys and simultaneously take out both your opponents. You can do this by placing the transparent sheet on top of the dance moves. When you find the correct dance move, translate the combined symbols with the Rosicrucian's code on the right side of the Chrono Decoder: FIVE.

**Key 3: 5**

**4) Don't forget to check your banknotes. How many notes are fake?**

Look at the five banknotes. The one that was clearly folded is a real banknote, as it says on the puzzle. Compare the other banknotes with this one and you'll find out that there are two notes that are not exactly the same as the real banknote. One has a monkey without teeth on the front side and an extra leaf on the back side. The other has empty spots around number 15 on the left of the front side and is missing a line in the triangle corner right below on the backside. So there are two fake notes.

Front

Back

Real banknote

**Key 4: 2**

**HINT 6: FIND THE DIFFERENCES BETWEEN THE BANKNOTES TO FIND THE AMOUNT OF FAKE BANKNOTES. YOU'LL ONLY NEED 1 SIDE. THE ONE WITH FOLDS IN IT IS REAL.**

**CODE 2: 4, 3, 5, 2**

## LEVEL 9 - THE EMERALD MOON

You have paid off Jesse's debt in the bazaar and continue your journey through the jungle. You enter a rugged area with three big mountains in the center. You open your bag and retrieve the clues that Alan left for you in the hut. Follow the instructions on the back of the moon drawing, turn over the finished puzzle and use the sketch on the back of the jigsaw puzzle.

### 1) Find the position of the Devil's Tooth at the moment of the event.

Fold the three mountains on the dotted lines and close with the flaps. Place each mountain on the correct square spots on the backside of the jigsaw puzzle. Use the drawing of the last emerald moon to place the mountains in the correct position. You can see that the person who drew the picture must have been standing to the left of the map, since one of the mountains has been drawn closer to the front than the others. You can recognize the mountains on the drawing by their details. Place the mountain models in a way that their details match the drawing. The Devil's tooth can be seen on the right side of the drawing and will therefore be located on the square spot with Roman numeral X.

**Key 1: X**

**HINT 7: FOLD THE 3 MOUNTAINS AND USE THE DRAWING OF THE LAST EMERALD MOON TO PLACE THEM ON THE CORRECT POSITIONS ON THE BACK OF THE JIGSAW PUZZLE. JAGUAR'S FANG GOES ON V.**

### 2) Find the position of the moon at the moment of the event.

Use the drawing of the last emerald moon also to find the location of the moon. We know that the person who drew the picture was standing on the left side of the map. On the drawing, the moon is in the upper right corner. This corresponds to the moon position being on the bottom right corner of the map, indicated by a parallelogram shape. Place the jewel in its holder on that spot on the jigsaw puzzle.

**Key 2:** 

### 3) Find the position of the stone plaque.

Use the flashlight on your smartphone and shine directly through the center of the green jewel. You will see that the Devil's Tooth mountain shadow points to the letter 'F'.

**Key 3: F**

### 4) Place the jewel in the hole with the correct color of the stone plaque.

Translate the symbols with the Rosicrucian's code on the right side of the Chrono Decoder and complete the sentence: "When the moon shines green, place the jewel inside the color of the Devil's Tooth's shadow". Use your flashlight to shine through the middle of the green jewel and you'll notice the shadow turning pink. The pink hole is marked by number 4.

**Key 4: 4**

**HINT 8: TO WHICH LETTER DOES THE SHADOW OF THE DEVIL'S TOOTH POINT (KEY 3)? WHICH COLOR DOES THIS SHADOW HAVE (KEY 4)?**

**CODE 3: X,  , F, 4**
